Dear Public Service Commission,

Duke should quit investing in dirty, old energy like coal and nuclear, and actually invest in the cheaper renewable technologies its executives claim to support. I want the Carolinas to be more energy efficient and powered by local wind & solar that will employ thousands of Carolinians.

Sincerely,

Lesley Wilson

Duke Energy can do better for us the consumers. We need clean air and we need their commitment to what is best for people NOT just their bottom line. And their bottom line is effected when dirty air effects our health costs.

Help the people of North Carolina
